

DooM  
The Shores of Hell

Screenplay By Lewis Fosdork

This chapter focuses on Arlene and HaydenBot (my favorite chapter :P)

FADE IN:

EXT. PHOBOS(?) - THE ANOMALY

ARLENE SANDERS runs across the rocky ground, a smoking gun in her hand. Not smoking from the barrel; it's melted. She's panicked, and panting, freaked by something unseen. It roars. She finds her way to a stair case that raises itself from the ground.

ARLENE  
(IMPATIENT)

Come on, come on...

She turns around as she hears loud footsteps, and a grey HELL KNIGHT steps towards her, its hand readying a BALL OF ENERGY. She quickly runs forwards, up the stairs, tossing her gun aside. It's useless, anyway. She makes it to the top, and looks down. The floor is strange, blurry, meshing into itself, like an aura migraine. The beast is right behind her, and she stumbles back, trips, and-

CUT TO:

INT. LOBBY

Arlene falls flat on her face, green fire coming off of her body, disappearing. She slowly stands up, and looks ahead. Behind a reception desk is a LARGE RED INVERTED CROSS DOORWAY. Written on the front of the desk: "WELCOME TO UAC DEIMOS".

SUPER: The Shores of Hell

Arlene walks to the desk, and finds a chair laying on its side. It seems to have been holding a BROKEN ROBOT. At some point, it had been knocked over by the ceiling falling onto it. She bends over, and wipes some dust off of the robot's chest; "HAYDENBOT" is written on the top left of its chest, right by the logo of the UAC.

She jumps backwards as it flickers to life suddenly.

HAYDENBOT

Hello.

Arlene stares in shock, and hesitantly waves. She stands up, and lifts the robot. Its pelvis falls off, and one of its arms is missing.

ARLENE  
Who or what are you?

HAYDENBOT  
Samuel Hayden, CEO and founder of the UAC.

ARLENE  
I thought you died?

HAYDENBOT

Well, I'm not the original Samuel Hayden.

ARLENE

Okay... I'm Arl-

HAYDENBOT

Private Arlene Sanders, NATO Marine Corps., I know. You've been here before. I have access to the records. You were stationed on Deimos until you were assigned to the Fox Squadron. Strap me to your back, and head to the highest point of the facility- The *newer* highest point. *They've* expanded since you were last here. I'll explain on the way.

Arlene raises an eyebrow at HaydenBot.

HAYDENBOT

We don't have a lot of time.
